TELIS
Call Center Suite

*Effective, affordable, and easy-to-use
call center solution for modern businesses.*

A customer journey does not end with a sale or a payment collection, each interaction with them influences their future choices. Telis Call Center Suite makes it easy to handle an organization's inbound and outbound calls, manage customer service agents, monitor their performance, and thereby the organization is able to offer their clients a better customer experience.

Easy to learn, easy to use and easy to manage solution that helps to shorten the issue handling time and increase agent productivity with automated call flow. Telis Call Center Suite has no constraints on the number of calls processed. It will have no negative impact on call quality. Combined with the routing functionality within the call center suite, incoming calls can be quickly distributed to the agents. When a caller gets connected to the agent who possesses the appropriate skills and knowledge, not only will it make the customer happy, but it will also reduce the load on the center. Telis Call Center Suite includes tools an organization needs to quickly improve their communication and team performances.

Use every phone interaction to increase your customer loyalty.

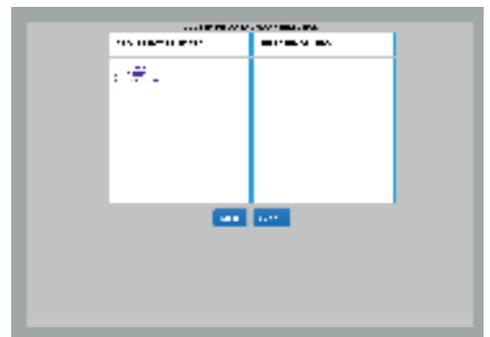

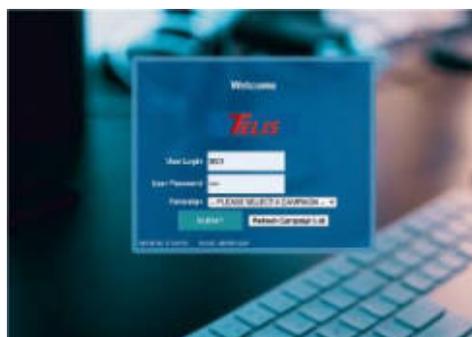

Save 40% of the call time by using an IVR.
